Policy Framework and Implementation Guidelines for Agentic GenAI Integration in Food Safety Systems

Joshi, S

Sep 30 2025

World Journal of Biology Pharmacy and Health Sciences 23 (3) , pp.303-315

This paper presents a comprehensive review of artificial intelligence (AI) applications in food safety and quality control, focusing on emerging technologies including generative AI, agentic AI systems, and automated compliance solutions. This review synthesizes current research and industry appl

Securing U.S. AI Leadership: A policy guide for regulation, standards and interoperability frameworks

Satyadhar Joshi

Sep 30 2025

International Journal of Science and Research Archive 16 (3) , pp.001-026

The rapid proliferation of Artificial Intelligence (AI) systems across diverse sectors—including healthcare, critical infrastructure, and digital experiences—has unveiled critical interoperability challenges that poses a challenge to the ongoing innovation, safety, equitable access, and the globa

Article

Gen AI in Financial Cybersecurity: A Comprehensive Review of Architectures, Algorithms, and Regulatory Challenges

Joshi, S

Jul 11 2025

International Journal of Innovations in Science Engineering And Management , pp.73-88

This paper provides a comprehensive review of the intersection of cybersecurity, generative AI, and risk within the financial sector. We explore how AI is being leveraged for both defensive and offensive purposes, the emerging threats posed by GenAI, and the critical need for robust risk manageme

4

Article

[Stochastic Modeling and Itô Calculus for Asset Backed Securities: A Practical Introduction within the Basel III and FRTB Framework](#)

Satyadhar Joshi

Jun 30 2025

World Journal of Advanced Research and Reviews 26 (3) , pp.2546-2573

This paper synthesizes the mathematical foundations of risk management for Asset-Backed Securitization (ABS) in light of the latest regulatory framework. We present a compilation of essential quantitative techniques, regulatory frameworks, and computational methods that form the core knowledge ba

5

Article

[Architectures and Challenges of AI Multi-Agent Frameworks for Financial Services](#)

Joshi, S

Jun 05 2025

Current Journal of Applied Science and Technology 44 (6) , pp.52-72

Artificial Intelligence (AI) multi-agent frameworks are enabling autonomous decision-making, intelligent collaboration, and the automation of complex workflows. These frameworks leverage Large Language Models (LLMs) and distributed AI systems to optimize operations across diverse sectors, with fi

Article

[A Comprehensive Review of Gen AI Agents: Applications and Frameworks in Finance, Investments and Risk Domains](#)

Joshi, S

May 24 2025

International Journal of Innovative Science and Research Technology , pp.1339-1355

This paper surveys the landscape of AI agent frameworks, highlights their core features and differences, and explores their applications in financial services. We synthesize insights from recent industry reports, academic research, and technical blog posts, focusing on frameworks such as CrewAI, La

Article

[Comprehensive review of Artificial General Intelligence \(AGI\): Applications in Business and Finance](#)

Joshi, SJS

May 01 2025

International Journal of Advances in Engineering and Management 7 (5) , pp.250-261

This paper delves into the multifaceted realm of Artificial General Intelligence (AGI), exploring its definition, evolution, potential applications, and the ongoing debates surrounding its development. We examine AGI's theoretical underpinnings, contrasting it with narrow AI and artificial superintelligence.

9

Article

[Generative AI in Investment and Portfolio Management: Comprehensive Review of Current Applications and Future Directions](#)

Joshi, S

May 01 2025

International Journal of Innovative Research in Engineering & Management 12 (2) , pp.1-12

Generative Artificial Intelligence (GenAI) is rapidly transforming the landscape of portfolio and investment management. This paper provides a comprehensive survey of GenAI applications in the industry, systematically reviewing over 50 contemporary sources. We analyze use cases in portfolio optimization, risk management, and asset allocation.

10

Article

[Generative AI in Business: Visual Illustrations of Applications and Insights from Q1 2025](#)

Joshi, S

Apr 30 2025

International Journal of Advanced Research 13 (04) , pp.172-189

This paper explores the current applications, benefits, and challenges of generative AI in various business domains, drawing from recent literature and industry reports from literature published in 2025. We examine key use cases including content creation, knowledge management, business process automation, and customer engagement.

[Advancing innovation in financial stability: A comprehensive review of ai agent frameworks, challenges and applications](#)

Satyadhar Joshi

Feb 28 2025

World Journal of Advanced Engineering Technology and Sciences 14 (2) , pp.117-126
Artificial Intelligence (AI) agents are revolutionizing industries by enabling autonomous decision-making, task execution, and multi-agent collaboration. This paper provides a comprehensive review of AI agent frameworks, focusing on their architectures, applications, and challenges in financial s

13

Article

[Review of autonomous systems and collaborative AI agent frameworks](#)

Satyadhar Joshi

Feb 28 2025

International Journal of Science and Research Archive 14 (2) , pp.961-972

This paper provides an in-depth review of the latest AI agent frameworks, focusing on the comparison of their features, architectures, and use cases. We examine well-known frameworks such as LangGraph, CrewAI, OpenAI Swarm, AutoGen, and IBM Watsonx.Ai, highlighting their strengths, weaknesses, an

Agentic Generative AI and the Future U.S. Workforce: Advancing Innovation and National Competitiveness

Joshi, S

Feb 07 2025

International Journal of Research and Review 12 (2) , pp.102-113

This paper presents a systematic review of generative AI applications in workforce development and education. We categorize the literature into key themes and synthesize findings to highlight trends, challenges, and future directions. Expected outcomes include enhanced training efficiency, broad

Article

[Enhancing structured finance risk models \(Leland-Toft and Box-Cox\) using GenAI \(VAEs GANs\)](#)

Satyadhar Joshi

Jan 30 2025

International Journal of Science and Research Archive 14 (1) , pp.1618-1630

This work explores the integration of generative artificial intelligence (GenAI), specifically Variational Autoencoders (VAEs), into statistical and structural financial models, with a focus on the Leland-Toft and Box-Cox frameworks. We conduct a comprehensive review of these models, highlighting

22

Article

[Using Gen AI Agents With GAE and VAE to Enhance Resilience of US Markets](#)

Joshi, S

Jan 28 2025

International Journal of Computational Science Information Technology and Control Engineering 12 (1) , pp.23-38

In this study, we explore the application of Generative AI (Gen AI) in enhancing interest rate models utilized in financial risk modeling. We employ advanced Gen AI Large Language Models (LLMs), including OpenAI's ChatGPT-4 and ChatGPT-4 Mini, as well as Google's Gemini versions 2.0 and 1.5, to g

Article

[The Synergy of Generative AI and Big Data for Financial Risk: Review of Recent Developments](#)

, SJ

Jan 19 2025

International Journal For Multidisciplinary Research 7 (1)

This paper presents a comprehensive review of the latest development in Generative AI and Big Data with application in Finance. 2025 is the year of Agentic AI, marking a pivotal shift in generative AI (Gen AI) and its integration with big data. This paper explores the synergies between Gen AI and

25

Article

[Review of Gen AI Models for Financial Risk Management](#)

Satyadhar Joshi

Jan 18 2025

International Journal of Scientific Research in Computer Science Engineering and Information Technology 11 (1) , pp.709-723

In this paper, we propose and demonstrate a prototype for leveraging Generative AI (GenAI) in financial risk analysis, specifically focusing on fine-tuning GPT models with proprietary data. Financial risk modeling, development, validation, and approval require not only advanced AI techniques but
